December 1999:749–754

SUBJECT INDEX
Bone, Volume 25, 1999

Abstracts
5th Workshop on Osteobiology, plenary lectures, 155
Activation frequency
Multicellular unit activation and origination in cancellous bone and, 585
Activin
Fracture healing and, rat, 191
A-disintegrin and metalloproteinase (ADAM10)
Localization in bone, 9
Aging
Vertebral wall width changes and, rats, 465
Alendronate
Clinical pharmacology, 97
Vertebral fracture recurrence risks and, 613
Alkaline phosphatase
Distribution in osteons, synchrotron radiation-induced X-ray emission analysis, 33
American Society for Bone and Mineral Research
Abstracts from plenary lectures, 155
Plenary lectures of 2nd joint meeting, 77
Antifusion regulatory protein-1
Osteoclast-like cell formation induced by, gene expression during, 17

Basic multicellular unit
Trabecular remodeling, computer simulation, 733
Bisphosphonates
Cell death of osteoclasts by, ultrastructural and cytochemical studies of, 447
Clinical pharmacology of, 97
Bone
ADAM10 and Notch receptor localization in, 9
Aminoterminally truncated fibroblast growth factor 4 anabolic effects, 431
Endosseous implants and, microdamage adjacent to, 217
N-methyl-D-aspartic acid-gated channels in bone cells, functional characterization, 631
Bone cells
Differentiation, Fos protein function in, 141
N-methyl-D-aspartic acid-gated channels in, functional characterization, 631
Nuclear factor-kappa B functions in, 137
Bone defects
Segmental repair, fracture healing and, rats, 321
Bone density
During and after reproductive cycles, rats, 553
Strain differences in mice, 413, 421
Bone disease
Hypophosphatemic, pathogenesis of, 131
Bone formation
Activin effects on fracture healing and, rats, 191
Calcitonin effects on skeletal metabolism and, animal and in vitro models, 509
Strain differences in mice, 421
Strain-adaptive, viscoelastic response of rat loading model, 379
Bone fragility
Structural basis, in men, 143
Bone geometry
Age at menarche and, premenopausal women, 69
Bone histomorphometry
Calcitonin effects on skeletal metabolism, animal and in vitro models, 509
Bone induction
Genetic variability of, mice, 25
Bone lamellae
Variations of, within osteons, nanoindentation examination, 295
Bone loss
Interferon-α effects on, 459
Parathyroid hormone and, monkeys, 301
Bone marrow cells
Development, after low calcium feeding, rats, 687
Bone mass
During and after reproductive cycles, rats, 553
Calcitonin effects on skeletal metabolism, animal and in vitro models, 509
Cancellous, changes in mandibular condyle after ovariectomy, rat, 339
Changes during pregnancy and lactation, rats, 681
Genes regulating, identification of, 85
Osteoclast identification and quantification and, 1
Tibolone effects, osteopenic rats, 311
Bone matrix
Demineralized, segmental bone repair and fracture healing and, rats, 321
Bone matrix proteins
Gene expression, after low calcium feeding, rats, 687
Bone mechanics
Fabric, density, and elastic properties of, 481
Tibolone effects, osteopenic rats, 311
Bone metabolism
In childhood hypophosphatasia, 361
Sympathetic system and, 545
Bone microarchitecture
Cancellous bone mechanical properties and, 55
Bone mineral density
Bone properties estimation, 725
Cancellous bone mechanical properties and, 55
Changes after parathyroidectomy, 237
In childhood hypophosphatasia, 361
Genetic factors and, 85
Hip fracture risk scores and, 369
Imaging and, 149
Parathyroidectomy effects on, in hyperparathyroidism, 589
Proximal femur strength, predictions, elderly patients, 49
Vertebral fracture recurrence risks and, alendronate effects, 613
Whole-body, in hyperparathyroidism, long-term follow-up study, 597
Bone mineralization
After callotasis lengthening, 333
Childhood hypophosphatasia, nonsteroidal antiinflammatory drugs effects, 603
Bone morphogenetic protein
Genetic variability of, mice, 25
Receptors, signal transduction by, 91
Bone morphogenetic protein-7
Chondrocyte differentiation inhibition by, parathyroid hormone-related peptide effects, 397
Bone properties
Mechanical, 3D structural analysis of, 55
Bone recovery
After gluten-free diet, long-term
Bone remodeling
Bisphosphonates and, clinical pharmacology, 97
Bone turnover markers after surgical menopause and hormone replacement therapy and, 349
Changes after parathyroidectomy, 237
Changes with age and parathyroid hormone therapy, rats, 465
Computer simulation of, 733

8756-3282/99/$20.00

Bone Vol. 25, No. 6
December 1999:749–754

Cortical width changes and bone turnover, in postmenopausal osteoporosis, 493
Extracellular matrix-integrin interactions and, 95
Metalloproteinase-13 expression during fracture healing, mice, 197
Multicellular unit activation and origination in cancellous bone and, 585
Static cortical, parameter differences between mandible and iliac crest, 577

Bone resorption
Bisphophonates and, clinical pharmacology, 97
Cathepsin K cloning and expression and, 205
Chemic sympathectomy effects, rats, 545
Osteoclast differentiation and function, molecular mechanisms in, 109
Osteoclast identification and quantification and, 1
Osteoclast-like cell formation induced by antifusion regulatory protein-1 and, 17

Bone sialoprotein
Isolation and culture of cementoblasts in cementum and, 39

Bone strength
Dual-energy X-ray absorptiometry, CT, and ashing evaluation, 713

Bone structure
Macro and micro, imaging of, 149

Bone tissue
Innervation of, 623

Bone turnover
After low calcium feeding, rats, 687
Markers of, after surgical menopause and hormone replacement therapy, 349

Bone ultrastructure
Scanning small angle X-ray scattering and Fourier-transform infrared microspectoscopy evaluation, 287

Bone volume
Cortical tibial, sciatic neurectomy and genetic regulation effects on, mice, 183

Calcitonin
Skeletal metabolism effects, animal and in vitro models, 509

Calcitonin receptor antibodies
Osteoclast identification and quantification and, 1

Calcium
Low levels, bone turnover, bone marrow cell development, and gene expression of bone matrix proteins after, rats, 687

Calcium kinetics
Growth hormone treatment effects, in osteogenesis imperfecta types III/IV, 501

Calcium metabolism
Strain differences in mice, 413

Callotasis lengthening
Bone mineralization at site, 333

Calvarial cells
Cultured on polystyrene, surface roughness effects on proliferation and alkaline phosphatase expression, rat, 439

Cancellous bone
Architecture, fabric, density, and elastic properties of, 481
Connectivity and elastic properties of, Letter, 741
Mass changes in mandibular condyle after ovariectomy, rat, 339
Mechanical properties of, BMD determination of, 55
Multicellular unit activation and origination in, 585
Vertebral, architecture, intraspecimen variations in, 245

Caspase
Thapsigargin-induced apoptosis in osteoblasts, signal transduction of, 453

Cathepsin K
Cloning and expression of, 205

Cbfa1
Osteoblast differentiation and function regulation by, 107

Cbfa1-deficiency
Skeletal cells and, morphological characterization, mice, 639

Celiac disease
Bone recovery after gluten-free diet, long-term follow-up study, 355

Cell death
Osteoclasts, by bisphosphonate treatment, ultrastructural and cytochemical studies of, 447

Cementoblast
Isolation and culture of, in cementum, 39

Cementum
Isolation and culture of cells involved in production, 39

Childhood hypophosphatasia
Bone metabolism and bone mineral density in, 361
Nonsteroidal antiinflammatory drugs effects, 603

Chondrocyte differentiation
Bone morphogenetic protein-7 inhibition of, parathyroid hormone-related peptide effects, 397
Growth plate, microtubules as regulator of, 405

Clodronate
Clinical pharmacology, 97

Collagenase-3
Expression during fracture healing, mice, 197

Computed tomography
Adult bone structure and timing of puberty, 69
Bone macro/micro structure evaluation, 149
3D structural analysis, mechanical properties of cancellous bone, 55
Quantitative, vertebral bone strength evaluation, 713

Computer simulation
Trabecular remodeling, 733

Condyle
Mandibular, cancellous bone mass changes in, afer ovariectomy, rats, 339

Cortical bone
Prostaglandin estradiol anabolic effects on, rats, 697
Width changes, bone turnover and, in postmenopausal osteoporosis, 493

Cytokines
Genetic variability of new bone induction and, mice, 25
Nuclear factor-kappa B functions in bone cells and, 137

Cytosensor
Osteocalcin receptor expression in osteoblasts and, 535

Diaphyseal bone
Growth hormone, exercise, and food restriction effects on, rats, 469

Distal forearm fracture
Risks, after gastrectomy, 61

Dizolcipin maleate
N-methyl-D-aspartic acid-gated channels in bone cells, functional characterization, 631

Drosophila melanogaster
Notch receptor localization and, 9

Dual-energy X-ray absorptiometry
Bone properties estimation, 725
Vertebral bone strength evaluation, 713

Elderly patients
Hip fracture, bone mineral density effects on risk scores, 369
Hip protectors, force attenuation properties in falling conditions, comparison study, 229

Endochondral bone
RANKL localization in skeletal and extraskeletal tissues and, 525

Endocrine tumors
Multiple endocrine neoplasia type 1, gene findings in, 119

Endosseous implants
Microdamage adjacent to, 217

Epidemiology
Fracture risks after gastrectomy, 61

Estrogen
Bone turnover markers after surgical menopause and hormone replacement therapy, 349
Osteogenesis induced by, indomethacin suppression effect, mice, 675

Estrogen receptor modulators
Selective, clinical use of, 115

Etidronate
Clinical pharmacology, 97

Exercise
Voluntary, tibial diaphyseal bone/muscle mass effects, rats, 469
Expressed sequence tag sequencing
Bone-related therapeutics and, 81
Extracellular matrix
Interactions with integrin, 95

F4/80 antigen
Osteoclast identification and quantification and, 1
Fatigue fracture
Matrix microdamage in, canine, 571
Femur
Proximal, strength predictions by BMD and ultrasound measurements, elderly patients, 49
Fibroblast
Extracellular matrix-integrin interactions and, 95
Fibroblast growth factor 4
Aminoterminally truncated, anabolic effects on bone, 431
Fibula fracture
Activin effects on healing, rat, 191
Finite-element analysis
Cancellous bone architecture, fabric, density, and elastic properties of, 481
Food restriction
Tibial diaphyseal bone/muscle mass effects, rats, 469
Fos protein
Bone cell differentiation and, 141
Fourier-transform infrared microspectroscopy
Bone ultrastructure evaluation, 287
Fracture
Fatigue, matrix microdamage in, canines, 571
Risks, after surgery for peptic ulcer disease, 61
Fracture healing
Activin effects on, rat, 191
Calcitonin effects on skeletal metabolism and, animal and in vitro models, 509
Metalloproteinase-13 expression during, mice, 197
Segmental bone defect repair and, rats, 321

G protein-coupled receptors
Parathyroid hormone and parathyroid hormone-related peptide and, 87
Gap junction
Effects on differentiation markers in osteoblastic cells, 661
Gastrectomy
Fracture risks after, 61
Gender disparity
Bone fragility in men, pathogenesis of, 143
Gene expression
Of bone matrix proteins, after low calcium feeding, rats, 687
Gene-based medicines
Bone-related therapeutics and, 81
Genetic factors/studies
Genetic variability of new bone induction and, mice, 25
Multiple endocrine neoplasia type 1, gene findings in, 119
Osteoporosis and, 85
Genetic regulation
Cortical tibial bone volume effects, mice, 183
Skeletal patterning, differentiation, and growth and, 77
Genomic tools
Bone-related therapeutics and, 81
Glutamate
Bone tissue containing, innervation of, 623
Glutamate receptors
N-methyl-D-aspartic acid-gated channels in bone cells, functional characterization, 631
Gluten-free diet
Bone recovery after, long-term follow-up study, 355
G-proteins
Osteocalcin receptor expression in osteoblasts and, 535
Growth
During and after reproductive cycles, rats, 553
Growth hormone
Tibial diaphyseal bone/muscle mass effects, rats, 469
Treatment, calcium kinetics effects on, in osteogenesis imperfecta types III/IV, 501
Growth-plate chondrocyte differentiation
Microtubules as regulators of, 405

Hemangiopericytoma
MRI diagnostic utility in oncogenic osteomalacia and, 375
Hip fracture
Bone mineral density effects on risk scores, 369
Risks, after gastrectomy, 61
Hip protectors
Force attenuation properties in falling conditions, comparison study, elderly patients, 229
Histochemistry
Zinc distribution in osteons, synchrotron radiation-induced X-ray emission analysis, 33
Histomorphology
Tibolone effects on bone mass, osteopenic rats, 311
Histomorphometry
Bone, observations on osteoporosis, Perspectives, 389
Cortical bone remodeling parameter differences between mandible and iliac crest, 577
2D vs. 3D nomenclature, Letter, 384
Microdamage adjacent to endosseous implants, 217
Hormone replacement therapy
Selective estrogen receptor modulators and, 115
Surgical menopause and, bone turnover markers after, 349
Hybridization, in situ
RANKL localization in skeletal and extraskeletal tissues and, 525
Hydrophilic polymer
Injectable bone substitute and, 67S
Hydroxyapatite
Porous, bone marrow cells and, bone regeneration effects, 51A
Hydroxylation
Vitamin D, targeted inactivation of, mice, 127
25-Hydroxyvitamin D
Targeted inactivation of, mice, 127
Hyperparathyroidism
Bone remodeling and bone mineral density changes after parathyroidectomy, 237
Hypovitaminosis D and, prevalence in Indo-Asian patients, 609
Parathyroidectomy effects on bone mineral density in, 589
Secondary, renal failure and dietary phosphorus effects, 279
Whole-body bone mineral density, long-term follow-up study, 597
Hypertrophy
Microtubules as regulator of, 405
Hypophosphatasia, childhood
Bone metabolism and bone mineral density in, 361
Treatment with nonsteroidal antiinflammatory drugs, 603
Hypophosphatemia
Pathogenesis of, 131
Hypophosphatemic osteomalacia
MRI diagnostic utility in oncogenic osteomalacia and, 375
Hypovitaminosis D
Prevalence in Indo-Asian patients, 609

Ibandronate
Clinical pharmacology, 97
Imaging
Bone macro and micro structure, 149
Immunohistochemistry
Activin effects on fracture healing, rats, 191
Osteoclast identification and quantification and, calcitonin receptor antibodies role, 1
Indomethacin
Estrogen-induced osteogenesis suppression, mice, 675
Insulin receptors
Osteoclast-like cells, Letter, 251
Integrin
Interactions with extracellular matrix, 95
Interferon-α
Lack of bone loss effects, rats, 459

Bone Vol. 25, No. 6
December 1999:749–754

Interferon-γ
Bone loss effects, rats, 459
Interleukin-1β
Stimulation of osteoprotegerin ligand gene expression in osteoblastic cells, 255
Interleukin-1 expression
Bidirectional signaling regulation during osteoclast formation, 269
International Bone and Mineral Society
Abstracts from plenary lectures, 155
Plenary lectures of 2nd joint meeting, 77
Intramembranous bone
RANKL localization in skeletal and extraskeletal tissues and, 525
In vivo
Bone mass changes during pregnancy and lactation in the rat, 681
Ion channels
N-methyl-D-aspartic acid-gated channels in bone cells, functional characterization, 631

Lactation
Bone mass changes during, rats, 681
Skeletal mass, chemistry, and growth during and after reproductive cycles and, rats, 553
Lactic acid copolymer
Sterilization influence on, 63S
Letters to the Editor, 251, 383, 741
Limb length discrepancy
Bone mineralization after callotasis lengthening, 333
Lymphocytes
Nuclear factor-kappa B functions in bone cells and, 137

Macrophages
Colony-stimulating factor-1 effects on, toothless rats, 175
Magnetic resonance
Bone macro/micro structure evaluation, 149
Magnetic resonance imaging
Diagnostic utility in oncogenic osteomalacia, 375
Men
Bone fragility in, pathogenesis of, 143
Menopause
Surgical, hormone replacement therapy and, bone turnover markers after, 349
Metallodisintegrin
Notch receptor activation and, 9
Metalloproteinase
Notch receptor activation and, 9
Metalloproteinase-13
Expression during fracture healing, mice, 197
Microdamage
Endosseous implants and, 217
Matrix, in canine fatigue fracture, 571
Microstructure
3D, trabecular bone, mechanical properties and, 487
Microtubules
Growth-plate chondrocyte differentiation regulation and, 405
Morphogenesis
Skeleton development and, 77
Multiple endocrine neoplasia type 1
Gene findings in, 119

Nanoindentation
Variations in thick lamellar properties within osteons, 295
Nerve fibers
Innervation of, 623
***N*-methyl-D-aspartic acid-gated channels**
In bone cells, functional characterization, 631
Nonsteroidal antiinflammatory drugs
Childhood hypophosphatasia treatment, 603
Nuclear factor-kappa B (NF-κB)
Functions in bone cells, 137

Organogenesis
Skeleton development and, 77
Osteoblast cultures
Isolation and hormonal responsiveness of, gender and age differences, 667
Osteoblast function
Extracellular matrix-integrin interactions in, 95
Osteoblastic cells
Gap junctional intercellular communication effects on differentiation markers in, 661
Osteoblasts
Differentiation and function, Cbfa1 as regulator of, 107
Estrogen-treated, osteoclast maturation and function and, 211
IL-1β and tumor necrosis factor-α stimulation of osteoprotegerin ligand gene expression in, 255
N-methyl-D-aspartic acid-gated channels in bone cells, functional characterization, 631
Osteocalcin receptor expression in, 535
Proliferation and differentiation, rough-surfaced substrates and, 439
Thapsigargin-induced apoptosis, signal transduction of, 453
Osteocalcin
Isolation and culture of cementoblasts in cementum and, 39
Osteocalcin receptor
Expression in osteoblasts, 535
Osteoclast differentiation factor
Osteoclast stimulation and, 517
Osteoclast resorbing activity
Tyrosine phosphatase SHP-1 as negative regulator of, 261
Osteoclastogenesis
Tyrosine phosphatase SHP-1 as negative regulator of, 261
Osteoclasts
Antifusion regulatory protein-1 monoclonal antibodies, gene expression during formation, 17
Bidirectional signaling regulation of IL-1 expression during formation of, 269
Calcitonin receptor antibodies role in identification, 1
Cell death by bisphosphonate treatment, ultrastructural and cytochemical studies of, 447
Colony-stimulating factor-1 effects on, toothless rats, 175
Differentiation and function, molecular mechanisms in, 109
Maturation and function, estrogen-treated osteoblast inhibition of, 211
Nuclear factor-kappa B functions in bone cells and, 137
Osteoblast/stromal cell stimulation of, 517
Osteogenesis
Estrogen-induced, indomethacin suppression of, mice, 675
Osteogenesis imperfecta types III and IV
Growth hormone treatment effects on calcium kinetics, 501
Osteoinduction
Genetic variability of, mice, 25
Osteomalacia
Oncogenic, MRI skeletal survey diagnostic utility in, 375
Osteons
Thick lamellar properties within, variations, nanoindentation examination, 295
Zinc distribution in, synchrotron radiation-induced X-ray emission analysis, 33
Osteopenia
Ovariectomy-induced, parathyroid hormone therapy, rats, 561
Tibolone effects on bone mass and mechanical indices, rats, 311
Osteopetrosis
Nuclear factor-kappa B functions in bone cells and, 137
Osteopontin
Isolation and culture of cementoblasts in cementum and, 39
Osteoporosis
Bone histomorphometry observations and, Perspective, 389
Cathepsin K cloning and expression and, 205
Parathyroid hormone therapy, bone loss effects, 301
Pathogenesis, genetic factors and, 85
Postmenopausal, cortical width changes with bone turnover and, 493
Risks, after gastrectomy, 61
Trabecular architecture and, biomechanical effects of variations in, 223

Osteoprotegerin ligand gene expression
IL-1β and tumor necrosis factor-α stimulation in osteoblastic cells, 255
Ovariectomy
Vertebral wall width changes and, age and parathyroid hormone effects on, rats, 465

Paget's disease of bone
Bisphosphonates and, 97
Pamidronate
Clinical pharmacology, 97
Parathyroid hormone
Receptors, biological importance of, 87
Parathyroid hormone therapy
Bone loss effects, 301
Ovariectomy-induced osteopenia, rats, 561
Vertebral wall width changes and, rats, 465
Parathyroid hormone-related peptide
Chondrocyte differentiation inhibition by bone morphogenetic protein-7 and, 397
Receptors, biological importance of, 87
Parathyroid tumors
Multiple endocrine neoplasia type 1, gene findings in, 119
Parathyroidectomy
Bone mineral density effects, in hyperparathyroidism, 589
Bone remodeling and bone mineral density changes after, 237
Peptic ulcer disease
Fracture risk after surgery for, 61
Pharmacology, clinical
Bisphosphonates, 97
Phenytoin
Osteoblastic differentiation effects, fetal rat calvaria cells in culture, 653
Phosphorus
Dietary, skeletal resistance to parathyroid hormone and, 279
Polyclonal antibody
Osteoclast identification and quantification and, 1
Pregnancy
Bone mass changes during, rats, 681
Skeletal mass, chemistry, and growth during and after reproductive cycles and, rats, 553
Propeptides
Bone turnover markers after surgical menopause and hormone replacement therapy and, 349
Prostaglandin estradiol
Anabolic effects on cortical bone, rats, 697
Puberty
Timing of, adult bone structure and, 69

Receptor activator of NF-κB ligand (RANKL)
Localization in skeletal and extraskeletal tissues, 525
Recombinant protein
Aminoterminally truncated fibroblast growth factor 4 anabolic effects on bone and, 431
Renal failure
Hyperparathyroidism and, 279
Reproductive cycle
Skeletal mass, chemistry, and growth during and after, rats, 553
Rickets
X-linked hypophosphatemic, pathogenesis of, 131
Risedronate
Clinical pharmacology, 97

Scanning small angle X-ray scattering
Bone ultrastructure evaluation, 287
Sciatic neurectomy
Cortical tibial bone volume effects, mice, 183
SHP-1
As negative regulator of osteoclastogenesis and osteoclast resorbing activity, 261
Skeletal cells
In Cbfa1-deificient mice, morphological characterization, 639
Skeletal chemical
During and after reproductive cycles, rats, 553
Skeletal differentiation
Genetic regulation and, 77
Skeletal function
Cell differentiation and, 107
Skeletal growth
Genetic regulation and, 77
Skeletal mass
During and after reproductive cycles, rats, 553
Skeletal metabolism
Calcitonin effects, animal and in vitro models, 509
Skeletal patterning
Genetic regulation and, 77
Skeleton
Resistance to parathyroid hormone, renal failure and dietary phosphorus effects, 279
Selective estrogen receptor modulator effects on, 115
Timing of puberty and, 69
Smad proteins
Signal transduction by bone morphogenetic protein receptors and, 91
Stress fracture
Matrix microdamage in, canines, 571
Sympathectomy
Chemical, bone resorption effects, rats, 545
Sympathetic system
Bone metabolism and, 545
Synchotron radiation-induced X-ray emission
Zinc distribution in osteons, 33

Tamoxifen
Skeletal effects of, 115
Telopeptides
Bone turnover markers after surgical menopause and hormone replacement therapy and, 349
Thapsigargin
Apoptosis induced by, in osteoblasts, signal transduction of, 453
Tibial bone
Cortical, sciatic neurectomy and genetic regulation effects on volume, mice, 183
Tibial diaphyseal bone
Growth hormone, exercise, and food restriction effects on, rats, 469
Tibolone
Bone mass and mechanical indices and, osteopenic rats, 311
Tiluronate
Clinical pharmacology, 97
Tissue remodeling
Extracellular matrix-integrin interactions in, 95
Tissue viscoelasticity
Effects on mechanical loading, Letter, 742
Tooth development
Molecular regulation of, 123
Toothless rat
Colony-stimulating factor-1 effects on osteoclasts and macrophages, 175
Trabecular architecture
Biomechanical effects of variations in, finite element study, 223
Trabecular bone
3D microstructural analysis, mechanical properties and, 487
Mechanical aspects of, 3D structural indices reflection of, 55
Volume, connectivity, and biomechanical competence, anabolic/antiresorptive agents effects on, 703
Trabecular remodeling
Computer simulation of, 733
Transforming growth factor-β
Signal transduction by bone morphoenetic protein receptors and, 91
Tumor necrosis factor-α
Stimulation of osteoprotegerin ligand gene expression in osteoblastic cells, 255
Tyrosin phosphatase SHP-1
As negative regulator of osteoclastogenesis and osteoclast resorbing activity, 261

Ultrasound
Attenuation, bone properties estimation, 725
Heel and tibia measurements, proximal femur strength predictions and, elderly patients, 49

Bone Vol. 25, No. 6
December 1999:749–754

Velocity
Bone properties estimation, 725
Vertebral cancellous bone architecture
Intraspecimen variations in, 245
Vertebral fractures
Prior history and bone density association risk, alendronate effects, 613
Vertebral wall width
Changes with age and parathyroid hormone treatment, rats, 465
Viscoelasticity
Rat ulna loading model, Letter, 383
Vitamin D
Hydroxylation, targeted inactivation of, mice, 127
MRI diagnostic utility in oncogenic osteomalacia and, 375

Wasting disorders
Inherited phosphate, pathogenesis of, 131
Women
Premenopausal, adult bone structure and timing of puberty, 69

X-linked hypophosphatemic rickets
Pathogenesis of, 131

Zinc distribution
In osteons, synchrotron radiation-induced X-ray emission analysis, 33
